

GOOGLE. APPLE.
AMAZON. FACEBOOK.
MICROSOFT.

There's a reason they're called "**The Frightful Five.**" As companies, they've created great products. But as monopolies, they serve only themselves. That's why we stand for independence over ecosystems. Freedom over filters. Speed over size. People over profits. That's why we choose, make ARE Firefox. Together we keep the web a free-er, weirder, healthier place.

THE FIREFOX FIVE

We're better. Here's why.

[MORE ACCESS]

1 Unfiltered

Only Firefox is determined to make sure you can access the entire internet, rather than getting trapped in corporate playpens.

[MORE FREEDOM]

2 Opt Out

Firefox is the original alternative: small but mighty, so your device can run lean and mean.

[MORE PRIVACY]

3 Nevermined

Only Firefox gives you this much control over your privacy, with advanced private browsing, tracking protection, and lean data practices.

[MORE SPEED]

4 Our speed kills

Only Firefox is lean from the ground up. And bonus: we don't need your computer's memory to process all those snooping ad networks.

[MORE PEOPLE POWER]

5 Web

Firefox is the only non-profit browser built for people, not profit.
